SUMMARY

Product leader and founder with 10+ years across product management, software engineering, and 0→1 product development. Builds AI-powered B2B products and owns production ML systems, enterprise workflows, and API-led platforms. Combines customer discovery, product strategy, technical execution, and measurable outcomes, including $1M annual savings, 4% YoY revenue growth, and 10,000+ manual hours automated monthly.

EXPERIENCE

Founder & Product Manager | BoloBit | Los Angeles, CA | 2025–Present

• Built an AI-powered B2B survey and insights platform from 0→1; own product strategy, discovery, UX, roadmap, algorithm design, and delivery.
• Owned a production hashtag trend-prediction service: Python/FastAPI microservice using scikit-learn RandomForestClassifier, deployed on AWS EC2 and connected to PostgreSQL (RDS).
• Defined prediction objective and signals—upvote, comment and share velocity, recency decay, and hashtag momentum; designed API integration, automated 15-minute retraining when labelled data is sufficient, model persistence, and momentum-heuristic fallback.
• Reviewed AI-pair-programmed implementation, deployed and own the service in production; treat predictions as directional pending independent validation because labels derive from the platform's trending score.
• Separately built the rule-based SBI analytics engine to identify business customers at risk of not renewing; this engine is fully tested. BoloBit analytics reduced insight-to-decision time from days to under two hours.

Product Manager | Viacom18 | Mumbai, India | Dec 2018–Oct 2021

• Built a 0→1 advertising optimization engine replacing a third-party solution, delivering $1M annual savings and contributing to 4% YoY revenue growth.
• Led a Traffic Order Management System across six enterprise B2B applications, automating 10,000+ man-hours/month.
• Delivered 20+ API integrations; coordinated five vendors, including two development partners, and generated $110K+ vendor savings.

Product Manager | High Furtados | Mumbai, India | Jul 2017–Nov 2018

• Revived an 18-month-stalled product and shipped MVP in three months; promoted to Lead Product Manager. Built a six-module platform contributing to 30% customer growth and 90% satisfaction.

Core Team — Product & Sales | Snaptasker | Bangalore, India | Oct 2015–Nov 2016

• Helped build a B2B marketplace from 0→1; MVP in four months, 100 transactions in six months, 30% client growth, and 14% revenue growth.

Full Stack Developer | Tesco | Bangalore, India | Nov 2011–Jan 2014

• Developed .NET/SQL supply-chain modules and supported desktop-to-cloud migration, improving load time by 150%; 2013 Hackathon winner.

SKILLS

Product: 0→1 Development, AI/ML Product Ownership, B2B SaaS, Discovery, Roadmaps, PRDs, Prioritization, OKRs/KPIs, Agile/Scrum, GTM
AI & Data: Python, FastAPI, scikit-learn, Random Forest, feature engineering, automated retraining/inference, LLM integration (Claude API), SQL, Tableau, A/B testing
Platforms: AWS EC2/RDS/S3, PostgreSQL, REST APIs, Node.js, React, MongoDB, Jenkins CI/CD, enterprise integrations

EDUCATION & CERTIFICATIONS

IIM Kozhikode — Diploma in Product Strategy (Top 1%, 92%) | GGSIPU — B.E., Computer Science
IBM AI Developer (2024) | Certified Scrum Product Owner (2023) | Google Data Analytics | Digital Marketing Analytics, University of Illinois
